# How to use the Auto-Buy app

If you are familiar with the flash sales or instant deals then you must have noticed that sometimes shopping go down few minutes before or after the sale. This happens because of huge hits on the deal page which makes the user unable to access the sale page on time. We know this problem very well so we designed the app in a similar way to give the best experience to our users.
Follow below steps for the app guidelines (RECOMMENDED)

As soon as you open Auto-Buy app you will notice a login page. Login or sign-up to create a new account, we will use your account details to send you notifications. You can turn-off the notifications or customize them from the settings page.
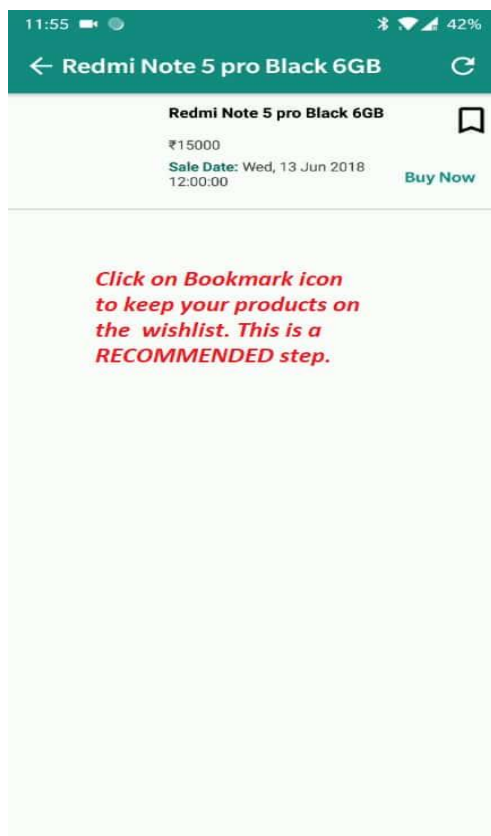

After a successful login, you will get a pop-up to select the site. Click on the site from where you are planning to buy the product.

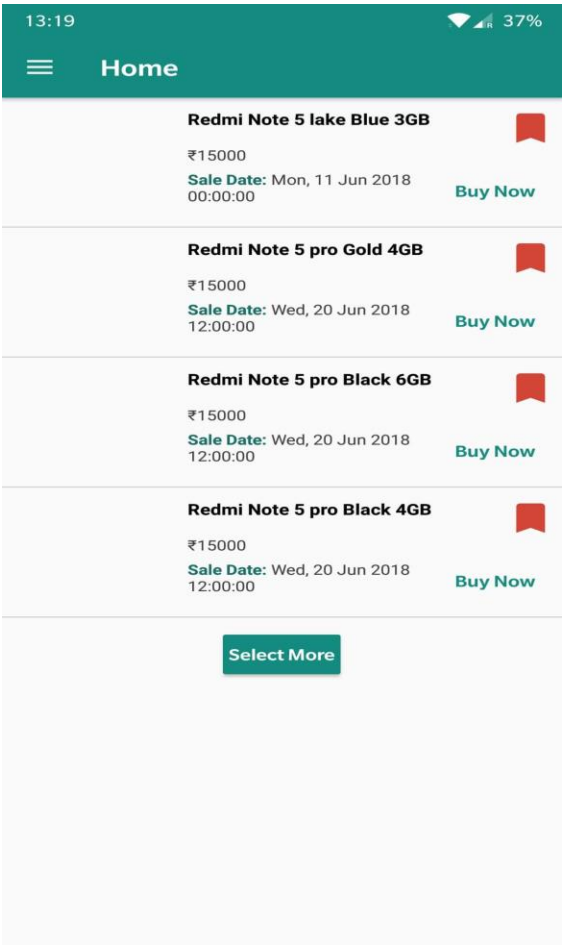

Now you will be presented with the list of products or deals from that particular shopping site.

Redmi Note 5 lake blue 4GB

₹15000

Redmi Note 5 Black 3GB

₹15000

Redmi Note 5 Gold 4GB

₹15000

Redmi Note 5 pro Gold 4GB

₹15000

Redmi Note 5 pro Black 6GB

₹15000

Redmi Note 5 pro Black 4GB

₹15000

Simply choose the products and keep them on the wishlist. This is very important and we recommend every user to pre-select the products on the wishlist.

Redmi Note 5 pro Black 6GB

₹15000

Buy Now

Click on Bookmark icon to keep your products on the wishlist. This is a RECOMMENDED step.

This wishlist can be accessed from the app home page. The main reason for creating wishlist is you can access your products or deals at any time. Even when the shopping site goes down you will hold an access to visit the product by using the wishlist.

PS: You can also continue without adding the products to the wishlist. We created the wishlist for a quick access and it's not mandatory.
